

CALL FOR ABSTRACTS: THE MOLLY K. MACAULEY AWARD

Important Dates:

Date	Action
2/03/2022	Abstract Submission Deadline – 11:59 PM EST, Thursday, February 3, 2022
3/17/2022	Abstract Acceptance Notification – Thursday, March 17, 2022
4/08/2022	Schedule Virtual Presentations Deadline
4/15/2022	Final Paper Deadline
4/18-22/2022	Virtual Presentations
4/29/2022	Winner Notification – Friday, April 29, 2022
7/18-7/20/2022	John Glenn Memorial Symposium

Background:

The American Astronautical Society Molly K. Macauley Award seeks to recognize future space industry leaders, by contributing to the professional development of a set of outstanding college and university students. Five finalists with one winner will be selected for each of two tracks: Business and Space Policy; and Science and Engineering. The two winners will receive a \$2,000 award. All ten finalists are provided with a \$500 travel award and free registration to attend the annual [AAS John Glenn Memorial Symposium](#). (The AAS Glenn Symposium will take place July 18-20, 2022, in Cleveland, Ohio). The two winners are required to make a 10-15 minute oral presentation at the Glenn Symposium.

The AAS Molly K. Macauley Award, created in 2019, is named for Molly Macauley, a national leader in environmental economics who helped for many years to establish, lead, and guide research projects combining economics with space research. Her fields of interest and goals were broad, including space-related renewable energy, new technologies and natural resources, and helping decision-makers understand the economics of space. Molly was tragically murdered in 2016 while out walking her dogs. Her murder is still unsolved today.

For background on this memorial award, please visit astronautical.org/awards/mollymacauleyaward/.

Applications:

Applicants for this award must be currently enrolled undergraduate or graduate students majoring in science and/or engineering or business and space policy (including law and economics) at an accredited college or university in the United States.

Applications require the following:

1. An abstract of up to 500 words (see the format below), outlining a space industry related research project in one of the following tracks:
 - Business and Space Policy aspects including Law and Economics
 - Technical aspects of a space-related gap in Science or Engineering
2. A short C.V. of the applicant, listing academic studies.

3. A cover letter up to two pages in length, written by the applicant. This letter should explain the applicant's interest in one or more of the fields of this award, and the applicant's expectations of gaining further experience or work in these fields.
4. A letter of reference (PDF format) supporting the application from a major professor or senior colleague. This letter of reference should be sent directly from your professor or senior colleague to aas@astronautical.org with the subject line: "2022 Macauley Award - Letter of Reference".

In March, five authors from each track will be invited to submit full papers and present their work orally to the AAS Macauley Review Committee in a virtual meeting setting. Full papers will be a maximum of ten pages (not including the supplemental documents – C.V., cover letter, letter of reference) detailing the subject of their abstract. Presentations will be 10-15 minutes in duration. The papers and presentations will be judged by a panel of experts during the month of April.

At the end of April, one applicant from each track will be selected to receive a \$2,000 award. Winners of each category are required to make a 10-15 minute oral presentation at the Symposium.

In addition, the ten finalists will receive a \$500 travel award and free registration to attend the AAS Glenn Symposium.

All student abstracts for the Macauley Award must be submitted to AAS no later than 11:59:59 p.m. Eastern Standard Time, February 3, 2022.

Abstract Format:

Abstract Title

Abstract: The body of the abstract begins here. It should be an explicit summary of your work that states the problem, the methods used or to be used, and the major results and conclusions expected or obtained. Do not include bullets, lists, graphs, or images in the abstract. The abstract should be a single-spaced document. The abstract is limited to 500 words.

Next the abstract should state the problem you propose to solve or the issue you set out to explore. Explain your rationale for pursuing the project. The problem or issue might be a research question, a scientific concern, a business challenge or space policy (including law and economics) challenge. The purpose of your study is to solve this problem and/or add to your discipline's understanding of the issue. This section of the abstract should explain how you solved or will solve the problem, or explore the issue you identified. Your abstract should also describe your research methods. This section should include a concise description of the process by which you will conduct or have conducted your research.

Next, the abstract should list the results or outcomes of the work you have done so far.

Your abstract should conclude with a statement of the project's implications and contributions to its field. It should convince readers that the project is interesting, valuable, and worth further investigation. The abstract should be compelling and attract the reviewers' curiosity.
